

Chatsworth | Apache Leather

Specification Sheet

Apache is a characterful, wax-finished leather with a naturally crackled surface and a soft, tactile hand feel. Its protective finish offers resilience against everyday marking, making it well-suited to busy homes and contract environments. The leather's distinctive matt appearance, subtle pull-up effect and natural surface variation give each piece a lived-in authenticity that develops beautifully over time, a finish chosen for its depth, durability and unmistakable Winchester character.
