

Chatsworth | Rimini Leather

Specification Sheet

Crafted from natural half-grain aniline leather, this exquisite hide carries the hallmarks of authenticity, an aged appearance that deepens with time and use. Its subtle pull-up characteristic reveals a gentle contrast: when stretched, the surface lightens to expose the hide's original tone beneath, creating a beautiful interplay of shade and texture.

This is leather that lives and breathes, responsive, tactile, and quietly expressive. Ideal for both residential interiors and refined contract settings, it offers not just durability, but a story told in patina and nuance. Every mark, every shift in tone, is a testament to its natural origin and artisanal finish.
